

Background

- There can be lots of things we love and may want to give our hearts to... things that we value. But it's important to prioritise them so that they don't get out of order.

Instructions

- Print and cut out the images on the following pages.
- Display them or lay them out so that all the children can see them.
- Begin by inviting two children to choose an image each, have them show it to the group and ask:
 - What is this an image of?
 - Which one do you think in the higher priority according to the kingdom of God?
- Then ask another child to choose another image. Discuss with the group where it fits in order of priority to the first two images. Then adjust the three images accordingly.
- Continue to do this with the remaining images until all are placed in order of priority.
- As you go through this activity, help the children to identify that sometimes our priorities can be different from the priorities of Gods kingdom. Sometimes we need the Holy Spirits help to understand how God wants us to priorities things so we don't get them mix up.
